

INVESTMENT POLICY TO PREVENT GLOBAL WARMING

The health of the Earth is essential to not just business, but also species survival. The Health, Safety and Welfare of all the stakeholders in our Company is the primary concern of CBE+.

The Company has consistently put sustainability projects first for capital investment and has now decided to debate and publish a policy to prevent global warming through technological change and investment decisions.

Any sustainability project will be given priority over any other capital investment with a similar Return on Investment. Any sustainability project with a reasonable chance of getting a return on investment of 5 Years or less, should be brought to the attention of the CBE+.

A written decision on any such project is mandatory within 3 months of project submission. Any sustainability project with a higher value should be immediately referred to management at CBE+.

As a business we undertake to use our personal and corporate presence to influence policy makers to legislate the requirement for such a policy for all businesses with more than 80 co-workers.

Current or potential supplier input is welcomed.

Management at CBE+ encourages employees and stakeholders to contact us by +441246529014 or by email on sales@cbepius.com to assist with the discreet implementation of this policy where necessary.
